1. When STM32F405RE6(LQFP64) is mounted, C20 and C23 must be populated!
2. When STM32F103RB6(LQFP64) is mounted, C20 and C23 must be shorted (for example with 0 Ohm resistor)
3. UTx symbol refers to STM32F103RB6(LQFP64).

For the STM32F405RE6(LQFP64), please see the corresponding datasheet!
